UX PROBLEM SOLVER

Front-end engineer & User Experience Designer

My Name is Josh Schoen. I love working as close to users as possible. I thrive on connecting design and development through agile processes to create truly unique and compelling experiences. I have design and developed e-commerce experiences, AI/ML model management applications and Real-time Analytical applications and built multiple design systems and component libraries. I am very passionate about delivering solutions to solve user problems that increases business value and user consumption. I take a design thinking approach to design, engineering and software delivery.

Experience

Digital.ai

📅 Jul 2020 - Present
📍 Remote

Director, Design Center

As a part of the senior leadership I manage a team of UX researchers, designers and front-end engineers. I lead and contribute to the design system and component library initiatives. I also play a key strategic role in unifying Digital.ai platform, products and capabilities through common services and consistent experiences.

ModelOp

📅 Feb 2020 - Jul 2020
📍 Remote

Senior UX/UI Engineer

Design, developed and led the front-end architecture of a greenfield AI/ML model management and governance enterprise application from proof of concept to a MVP.

Optum

📅 2019 - 2020
📍 Eden Prairie, MN

Front-end Developer, Design Pattern Library

Develop reusable, responsive HTML components and drove roadmaps around the Optum Design Pattern Library for digital. Identified opportunities to create a unified consumer experience across Optum's web properties.

Teradata

📅 2017 - 2019
📍 Minneapolis, MN

Lead UX/UI Front-end Developer

Web application developer focusing on customer experience. Designed, built and maintain applications for numerous projects using Teradata's open source Covalent UI Platform built on Angular and Material Design.

Allen Edmonds

📅 2015 - 2017
📍 Bloomington, MN

E-commerce User Experience Lead

Lead web designer, designed and coded HTML, CSS & JavaScript for ongoing responsive website needs. Oversaw e-commerce feature changes supported by user interviews, analytics and user testing.

Lancet Data Sciences

📅 2012 - 2015
📍 Burnsville, MN

Staff Design Consultant

Design consultant leveraging Tableau, MicroStrategy, HTML5, CSS and JavaScript. Front-end Developer creating mobile and web business intelligence dashboards. Designed, built and maintained company's multiple websites.

Education

Bachelors of Science in Design Technology

Specialization in Exhibit Design
Bemidji State University, 1996 - 2001

Masters of Information System Management

Specialization in Information System Tools
Keller Graduate School, 2009 - 2011
